Multi-Agent Orchestration (Gemini Powered)
SERVICE
Orchestrator Agent
Coordinates multi-agent workflows using LangGraph, Gemini reasoning.
LangGraph
Python
Gemini Pro 1.5
Docker
SERVICE
Data Analysis Agent
Deterministic metrics and rule-based anomaly detection
unspecified
SERVICE
Bottleneck Detection & ...
Deterministic metrics and rule-based anomaly detection. Predicts future...
unspecified
SERVICE
Root Cause Agent
Gemini-powered reasoning for root-cause explanation.
unspecified
SERVICE
Impact Assessment Age...
Gemini-powered reasoning for impact interpretation (Customer,...
unspecified
SERVICE
Recommendation Agent
Gemini-powered recommendations (Bottleneck, Root Cause, Priority,...
unspecified

Log Actions
SERVICE
CI/CD Pipeline
Automated build, test, and deployment pipeline.
GitHub Actions
Docker Builds
SERVICE
Container Registry
Secure storage for containerized service images.
Docker Hub
GHCR
AWS ECR
Human-in-the-Loop & Execution Layer
SERVICE
Human Approval Gate
Mandatory human review step for all AI-generated recommendations.
React UI
FastAPI
Docker
SERVICE
Action Execution Agent
Executes approved actions (Jira, Slack). Deterministic logic.
Python
FastAPI
Docker
Edge & User Interface Layer

Recharts
API GATEWAY
Enterprise API Gateway
Routes incoming requests
Enterprise API Gateway
External Systems & Integrations
CLIENT
Enterprise Data Sources
External enterprise systems providing raw operational data.
Jira API
GitHub API
Salesforce
Zendesk
CLIENT
Notification Channels
External notification and task management systems.
Slack Webhooks
Jira API
CLIENT
GitHub Repository
Source code repository for the platform.
GitHub
Data Ingestion & Processing Layer
SERVICE
Ingestion Service
Ingests raw data from enterprise sources. Deterministic logic.
FastAPI
Python
Docker
Pydantic
SERVICE
Normalization Service
Cleans and redacts PII from operational data. Deterministic logic.
Python
Pandas
Presidio
Docker
MESSAGE QUEUE
Ingestion Queue
Asynchronous buffer for high-volume operational data ingestion.
RabbitMQ
Docker
AMQP
